Cover pools with a national focus

The cover pool used to collateralise the mortgage covered bonds is clearly residential in character. 97.7% of the cover pool volume is attributable to residential assets, of which the largest share (94.8%) is allocated to the category private use incl. multi-family housing. The share of commercial cover assets comprises the remaining 3.3% of the cover pool. While all issues are denominated in EUR, 4.6% of the cover assets are denominated in Swiss francs in addition to the euro. Austria's share in the cover pool is 76.3%. The remaining assets, however, are located in the Netherlands. Within Austria, the regions of Lower Austria (29%), Styria (20%) and Vienna (17%) dominate. With a total of 43,095 loans to 36,139 borrowers, which were used to finance a total of 43,407 properties, the cover pool can be described as granular, which is also reflected in the average loan volume of around EUR 117,000. The ten largest loans accounted for 1% of the cover pool volume. The cover pool of the Public Sector Covered Bonds consists mainly of claims against municipalities or loans guaranteed by them (74.1%), followed by loans to federal states (19.4%) or claims with guarantee of federal states. 97.7% of the claims are due from Austrian borrowers. The remaining 2.3% are owed by debtors from Germany. Within Austria, the focus is on the regions of Styria (28%), Lower Austria (24%) and Upper Austria (16%).

Rating and regulatory treatment

Both the mortgage and public sector programme issues have the highest rating of Aaa from Moody's. In our opinion, benchmark bonds are therefore suitable as Level 1 assets in the context of LCR management. In addition, all covered bonds benefit from a preferential risk weighting of 10% according to the CRR. In addition, covered bonds can be purchased under both CBPP3 and PEPP by the Eurosystem.
